

Input Distribution and Alternatives to Chemical Fertilizers Capacity Building Programmes Organized at ICFMD, NIFMD Campus

On 07.05.2026, Input Distribution Programme under DAPSC was organized by ICAR-NIFMD-International Centre for Foot and Mouth Disease at ICFMD Campus for SC farmers. The programme was conducted with a long term vision for upliftment of scheduled caste community. During the programme a total of 76 beneficiaries from SC community (13 Gram panchayats) participated. During the programme, as per the directives from ICAR and GoI, all the SC beneficiaries were made aware with the alternatives to chemical fertilizers, like vermicompost, green manure etc. They were shown videos on such initiatives where vermicompost and other alternatives were discussed. Few of the lady farmers expressed their interest on adopting vermicompost as they have sufficient land, straw and cow-dung required for the purpose. Dr. M. Rout also apprised the farmers on the matter. Input distribution was conducted as per Institutional mandate.
